MUTANT CAT-DOG CROSS BREED ESCAPES FROM LAB

THE SECURITY AT VEQUICK LABS:

Last Sunday Vequick Labs were experimenting with a mysterious creature. It currently has no name but Vequick Labs files dub the project A4T7. On Sunday after the lab finished experimenting they placed the creature back in its cage. But as the cage was used for many other ravenous creatures the structure of the cage was weakening & eroding. On top of all the unchecked problems worker Aaron Kale forgot to secure two of the three locks so an escape was bound to happen.

That night there was a loud bang followed by a roar & the sound of collapsing walls as the monster raced out into the darkness. The air raid sirens sounded & radios in the nearest province warned of the creature. The local SWAT teams were dispatched. Next morning the thing was seen in a field. The SWAT team immediately moved in but by the time they arrived it was already gone. If you see the creature call
