SUS BUT & CO BURGERS FOUND TO BE MOLDY

**MCRONALDS IS
NOW OPEN !!!**

In last weeks news you might have seen an advertisement for a certain “mcronalds restaurant” but if any of you actually went to the restaurant you would have quickly discovered that it was a scam and all of the burgers were moldy

the restaurant was (of course) a division of sus but & co and (of course) used a plagiarized name (from Mc Donald's®) it turns out that the meat they had used was from the non trustable meat industry “meaty foods” & the meat they used was over 18 years old (from 2008, ew) and was incredibly moldy & stale. A sample of meat was taken to a lab* to get analyzed & the workers found approximately seven new diseases in the meat along with a supposed new life form in the meat. The president of susbut & co Gregovitch Susbut was immediately arrested & put in a holding cell while an investigation was initiated

1: Fromage 2: no
3: Chicken Tikka
Masala
4: Achilles

SusBut & co is shut down for AN INVESTIGATION

Continuation of page 1

**SUS
BUT** & co[®]

We put the “but” in
product quality !

After many past incident's involving susbut & co including the tastables incident, Are chill pills drugs & the most recent moldy burgers it was this final indecent witch caused the investigation susbut & co

The government shut down all the “susperstores” that the company owned & recalled any of there products from all other superstores. They also sized there factory & waste pit & arrested the CEO (as you may have heard) the government then banned all of there products from circulation & sized the rights to all of there products. As of now the public is protesting against the government but these protesters are mostly crazed people braiwashed by the sus but & co corparation the investigation is still ongoing as of writing

Brain Rot kid has disease called “Six-seven addiction” Is sent to a facility for rehabilitatin

So far in society many of the brainrot kids have been rehabilitated or went back to being sane but there continues to remain one child that will “never abandon” his brain rot.

Although we cannot say the child's full name we are allowed to describe the addiction towards the two numbers. One of the most prominent features of the addiction is he continues to blame his class mates for the supposed infection although research shows that his friends are free of the curse. Another sign of addiction is him calling his friends “six seveners” & him repeatedly mentioning the two numbers in any conversation for example if you asked him his favorite color he would probably respond with “six-seven” same with his favorite class his answer would most likely to be six seven

This proof was all the mental facility needed to capture the child & place him in a holding cell where he was exposed to “anti six-seven” content. The child is still in the facility however he seems to be getting better
